IDS Teat - Post

The IDS Teat - Post spray system is an affordable vision guided robot that applies spray teat disinfection on rotary parlours post-milking. Offering a controllable, convenient and reliable solution for real world farming environments.

The fast drive control mechanical arm uses a 3D camera to identify and locate teats quickly and accurately – enhancing animal welfare with consistent results every time. Our dedicated team of engineers create a customised installation for each site, meeting the needs of both farmer and animal. The IDS Teat - Post Spray System is competitive, simple and affordable. We work with our farmers to provide a tailored pricing plan, while supplying regular machine servicing and support. The IDS Teat system from Peacock Technology, improving your world with robotics and artificial intelligence.

IDS Teat - Post

- Consistent and reliable spray application
- Reduces the risk of mastitis
- Reduces labour requirements
- 3D camera accurately identifies teat location
- Adjustable operation time to match parlour speed
- 24/7 support via remote access monitoring
- Fully compatible with all external rotary parlours
